Summary

Data Scientist / AI Engineer with 3+ years designing end-to-end Generative AI solutions — LLMs, LangChain, LlamaIndex, vector databases, and prompt engineering (CoT, ReAct, agents). Hands-on with SaaS LLM platforms (OpenAI, AWS Bedrock) and open-source models via HuggingFace/PyTorch. Strong in Python application development, FastAPI, Docker, and full SDLC ownership. Immediate joiner.

Professional Experience

Junior AI Engineer

Apr 2026 – Present

Concept Good Consulting, Pune

- Designed and implemented end-to-end Generative AI solutions using LLMs (OpenAI GPT, Claude, LLaMA, Mistral) with LangChain, LlamaIndex, and vector databases (Pinecone, ChromaDB, FAISS).
- Applied advanced prompt engineering — Chain-of-Thought, ReAct, agentic workflows (LangGraph, CrewAI) — for multi-step reasoning and tool-calling automation; built reusable RAG and agent frameworks.
- Owned the full SDLC — design, testing, deployment, maintenance — for FastAPI microservices on AWS (Lambda, EC2, Bedrock, S3) with Docker; participated in code reviews for quality standards.
- Collaborated cross-functionally to integrate AI services into core systems; researched and applied the latest developments in generative AI.

Implementation Specialist — Python / AI

Jan 2025 – Mar 2026

HotelKey Ind Pvt Ltd, Nagpur

- Built RAG retrieval workflows on enterprise data (LangChain, HuggingFace, vector embeddings); developed GPT-powered chatbots and FastAPI microservices, improving system interoperability by 80%.
- Automated CI/CD with Jenkins, Git, and Docker; raised release stability 35% via PyTest-driven testing while processing 100K+ daily records.

Software Engineer Trainee

Feb 2024 – Dec 2024

Enable Infotech, Solapur

- Contributed to Python application development following OOP principles and software engineering best practices; gained hands-on exposure to Git and collaborative SDLC workflows.
- Assisted in building, testing, and debugging internal tools and scripts; participated in code reviews to support release quality.

Projects

Enterprise RAG & Generative AI Platform

LangChain, OpenAI, Pinecone, FastAPI, AWS

- Production RAG system with semantic search, document Q&A, and summarisation over private knowledge bases; streaming REST APIs deployed on AWS Bedrock.

Autonomous AI Agent Framework

LangGraph, CrewAI, Python, FastAPI

- Multi-agent system using ReAct and tool-calling patterns to automate research, summarisation, and report generation end-to-end.

Technical Skills

Core: Python, FastAPI, Flask, Docker, Git, REST APIs, OOP & Software Design

NLP & GenAI: Classification, Topic Modeling, Q&A/Chatbots, Search, Summarization, Content Generation, Prompt Engineering (CoT, ToT, ReAct, Agents)

Frameworks: LangChain, LlamaIndex, LangGraph, CrewAI, HuggingFace Transformers, PyTorch, AWS Bedrock, Azure OpenAI (familiar)

RAG & Vector DBs: Pinecone, ChromaDB, FAISS, Weaviate, Embeddings, Semantic Search, Fine-tuning (LoRA/PEFT)

Cloud: AWS (Lambda, EC2, S3, Bedrock), Azure (familiar), GCP (familiar)

SDLC: Code Reviews, CI/CD (Jenkins, Git), PyTest, Technical Documentation, Agile

Education & Certifications

B.Tech in Computer Science Engineering

2020 – 2024

Solapur University

AWS Cloud Practitioner (CLF-C02) | Generative AI with LangChain & HuggingFace (*In Progress*) | Machine Learning Specialization — Coursera
